Essential connectivity tools for Enterprise Resource Planning environments

- Enhance the functionality of your printers and multifunctional devices in SAP R/3 environments

- Save time and reduce the cost of producing professional looking documents

- Print barcodes and use OCR within SAP R/3

Connectivity – harnessing the full power of networked output devices

In today's atmosphere of heightened competition and more sophisticated customer demands, the sharing of key document resources across digital networks is improving the efficiency and productivity of businesses everywhere. Our new breed of advanced, printers and multifunctional products (MFPs) utilize the power of centralised management and access, to provide reliable and flexible document output solutions that will integrate seamlessly into your network environment.

Nashuatec's unique approach, links people with knowledge and expertise, combining our wide experience of innovative, document related Products and Software Solutions with our world class Business and Professional Services to deliver the best Total Document Solutions for your business.

TOTAL DOCUMENT SOLUTIONS

Specialised connectivity tools for Enterprise Resource Planning (ERP)

The widespread adoption of ERP to manage key areas of enterprise activity has been a major driver in the development of digital networking and the sharing of information. From product planning through purchasing, inventory, supply chain interactivity to customer service and order tracking, ERP demands seamless integration of all information processes, technologies and output devices. Streamlined document processes provide fast easy access to business critical information and are essential to the success of any enterprise wide solution. The key to truly efficient document processes and reduced Total Cost of Ownership (TCO) is the right tools that can unlock the full potential of your networked multifunctional product and printing devices.
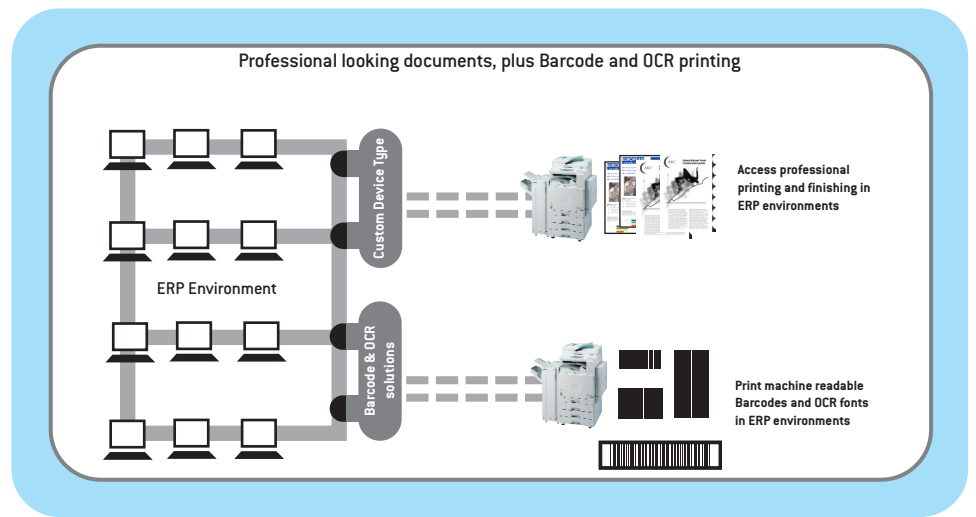

High productivity printing tools for SAP R/3 environments

SAP users in sales, manufacturing, trading and financial markets have traditionally been faced with problems generating professional looking reports and documents from SAP environments. We can provide an essential tool that can take advantage of SAP's ability to accept Custom Device Types, which takes users beyond the limitations of SAP functionality to improve productivity and reduce TCO.

SAP R/3 Custom Device Type

Today, we can offer SAP R/3 Custom Device Type, a powerful tool that enables users to easily select and use our sophisticated hardware finishing options in a SAP R/3 environment.

Our range of printers and MFPs fully comply with SAP R/3 Custom Device Type architecture. SAP users can now use the full capabilities of their devices to produce more professional looking reports, invoices and other SAP based documents and reduce TCO. Without SAP R/3, Device Type users are obliged to use a generic driver which, only allows basic printing on output devices, for example one-sided prints.

Professional looking documents, plus Barcode and OCR printing

ERP Environment

Custom Device Type

Barcode & OCR solutions

Access professional printing and finishing in ERP environments

Print machine readable Barcodes and OCR fonts in ERP environments

Business benefits are:

- SAP R/3 Device Type enables increased functionality on devices, for example, multiple input trays, multiple output trays, duplex printing, multi-up printing, finishing such as stapling and hole-punching
- Cost reductions through option to duplex in SAP R/3
- Time saving - eliminates manual intervention
- Improved document presentation
- Enhanced utilisation of networked devices
- Reduces IT administration

Barcode & OCR Printing for SAP R/3

These solutions enable our customers to improve their SAP R/3 document workflow and reduce costs by providing machine-readable barcode and OCR font printing from our hardware.

For low to mid level outputs devices, these functions are provided via a DIMM based package which has barcode and OCR font pre-installed. For mid to high-range output devices, our Hard-Disk package supports barcode and OCR font download to the appropriate MFP or printer device. At the top level, we offer an intelligent barcode and OCR package that provides automatic device discovery, device status monitoring and central control of licences over a network for up to 100 devices. It enables IT Administrators to monitor device status and manage device configuration from a PC or laptop. This intelligent solution can be professionally installed via the network and activated on-line.

Fast access via on-line downloads

To maximise productivity of your device in an Enterprise Resource Planning environment and for further information and downloads, please visit our website or contact your local sales company:
